Devam Systems Pvt Ltd

***Perceiving Your Dreams

About Devam Systems Pvt. Ltd.

Devam Systems Pvt. Ltd. (DSPL) was incorporated with zeal to establish ourselves as a one of the most Technically Focused, Customer Oriented Company in this competent arena of IT World.

Pvt Ltd is an organization specializing in providing enterprise software like customized and standard ERP Application and e-Business Applications to corporate through its business and technology experience.

From the beginning we preside over strong ties with our clients in several business sectors: Financial, Insurance, Public administration, Manufacturing and distribution, Transportation, High technology, Public services, Education, Retail health care etc.

DSPL's commitment to stay at the forefront of information technology is absolute by proactively evaluating advances in the industry and applying them to business needs. DSPL takes a great pride in its ability to translate the world-class technical and consulting strengths into complete solutions for its clients. The breadth of business expertise and technology skills enables DSPL to function as a single source for all IT requirements.

DSPL's understanding of business environments helps in maximizing the value of the relationship with its clients. **DSPL** focuses on developing a long-term integrated solution partner relationship with clients.

DSPL's services span across the thorough understanding of relevant technologies, combining them with the panoply of skill sets (software, design and platform technologies) we are fully equipped to transform your organization into a veritable e-force. Our ability to deliver custom designs backed by a total service commitment is what differentiates us from our competitors. Our programs demonstrate our commitment to help customers realize the full benefits of our software.

"Our spirit of innovation and sound management principles has earned us the confidence and trust of an extensive client base".

AREAS OF EXPERTISE

We specialize in providing the following IT services:

❒ **Business Solutions**

In today's dynamic business environment, there is a strong need for the organizations to become competitive not only locally but also globally. **DSPL** develops and provides comprehensive and cost effective information technology solutions and services to individuals and organizations to improve their competitiveness and to push their business to new heights. To develop business solutions we have expertise in Microsoft technologies like visual studio, VS. NET, PHP and lotus notes integrated with various databases like oracle, MS SQL server, MySQL, MS Access etc.

❒ **Smart Card Solutions**

Today's world is all about Smart cards! Wherever you go life is packed in smart cards.
Show the card & get things done like ATM cards, Petro-cards, Bill payments, Patient case history, Attendance, Library, shopping yards etc. We provide Business solutions integrated with smart cards. This solution also includes biometrics devices, RFID devices and GPS system.

❒ **Web Solutions**

We help clients to create and implement strategies for enhancing efficiency and competitiveness using interactive and internet-based technologies, especially Lotus Notes for mail management. We offer single-source capabilities to respond to all of your interactive communication and marketing needs, whether it's designing and implementing custom Web-application, creating or re-engineering a Web site or consulting on Internet business strategies. This is done via a process that blends the talent of professional experts in business management, marketing, communications, information technology, and graphics & interface design.

❒ **Corporate Training & Consulting**

DSPL dedicates itself to fill the constant gap of knowledge created by the emergence of latest technologies. We are committed to bringing quality education to the corporate world by using and adopting the latest information, communication and education technologies. We are continuously striving to achieve the higher end of quality and customer satisfaction. In achieving these goals, our human resources are the most valuable assets as they effectively contribute towards overall student satisfaction with their invaluable experience, expertise and qualifications.
